PROFESSIONAL SUMMARY

Performance-focused Senior Frontend Developer with over 10 years of experience designing and implementing scalable, internationalized web applications. Expert in React, Next.js, and TypeScript, with a proven track record of increasing engineering velocity by 35% and improving platform performance metrics by 25+ points. Adept at leveraging LLMs to optimize software architecture and maintainability. Committed to building robust, accessible, and high-conversion commerce interfaces within agile, cross-functional teams.

SKILLS

Frameworks: React.js, Next.js, Vite, Vue.js

Languages: TypeScript (Advanced), JavaScript (ES6+), Portuguese (Native), English (B2/Professional)

State & API: TanStack Query (React Query), Zustand, Context API

Performance & Testing: Core Web Vitals, Jest, React Testing Library, Zod

Architecture & DevOps: Micro-frontends, CI/CD (GitHub Actions), VTEX IO, LLM Integration

WORK EXPERIENCE

Datum | Senior Frontend Developer (Remote) | 09/25 – Present

- Architect and scale internationalized web platforms using React and Next.js, implementing locale-aware routing to ensure native-grade global experiences.
- Integrate LLM-driven development workflows for automated boilerplate and unit test scaffolding, increasing feature-delivery velocity by 35%.
- Establish AI-assisted code review standards, reducing cycle time for complex technical reviews by 50%.

Develcode | Senior Frontend Developer | 10/24 – 05/25

- Engineered high-performance SPAs, reducing initial load times by 45% and achieving 95+ Lighthouse performance scores.
- Streamlined API state synchronization via React Query, decreasing redundant server-side calls by 40%.
- Built and validated complex multi-step forms with React Hook Form and Zod, reducing user input errors by 60%.
- Transitioned global state to Zustand, reducing boilerplate by 50% and improving re-render efficiency.

Grupo GBI | Senior Frontend Developer (Remote) | 01/24 – 08/24

- Led performance and accessibility (WCAG 2.1 AA) initiatives, consistently maintaining 95+ Lighthouse scores.
- Configured automated CI/CD pipelines with GitHub Actions, reducing manual deployment overhead by 80% and cutting deployment time to under 8 minutes.
- Mentored junior engineers through structured pair programming, decreasing onboarding time for new hires by 40%.

Trivod | Senior Frontend Developer (Remote) | 05/21 – 11/23

- Architected large-scale storefronts using React and VTEX IO, supporting a 30% increase in concurrent traffic.
- Implemented micro-frontend architecture to enable independent deployment cycles, reducing cross-team merge conflicts by 45%.
- Optimized mobile rendering for VTEX, resulting in a 20% lift in mobile conversions and a 70% reduction in Cumulative Layout Shifts (CLS).

Evolua Empresas | Frontend Developer | 11/17 – 10/20

- Contributed to high-traffic production codebases, shipping 30+ UI features while maintaining 85%+ test coverage.
- Refactored legacy UI modules into functional React components, improving maintainability by 15%.

Earlier roles: RGB Comunicação, JET e-business, Somenek Comunicação

EDUCATION

Bachelor's in Information Technology | Descomplica Faculdade Digital | Expected 01/27
